

**ARE YOU  
PREPARED?**

**STAN**

SOUTHEAST TEXAS ALERTING NETWORK

**[www.thestan.com](http://www.thestan.com)**

## STAN Keeps You Informed

STAN, the Southeast Texas Alerting Network, is a messaging and notification system that keeps the communities of Southeast Texas informed about emergencies and other important events in the area. Through STAN, industrial companies and emergency management officials can quickly notify you about emergencies, industry or weather events occurring in Southeast Texas.

## You Can Contact STAN

Visit the website [www.theSTAN.com](http://www.theSTAN.com), anytime to read the most current updates regarding emergencies, plant operations, traffic and weather information or other outreach from emergency management.

## STAN Can Contact You

Local emergency management uses STAN to send two types of messages to the public:

- **Emergency messages:** In the case of an event that warrants public action, local emergency management can send emergency messages describing what actions need to be taken in response to the emergency.
- **Outreach messages:** Additionally, emergency management uses STAN to send local notifications, or outreach messages, to the community, such as water outages, street closures or traffic notices.

## Are You Prepared?

Part of being prepared is making sure you will be notified in the event of an emergency. When an emergency occurs, STAN will call residential and commercial telephones in the affected areas. Since you're not always at home, you can register your cell phone to make sure you receive notifications no matter where you are. That way, if you're at work and something happens near your home, you'll know about it.

Go to **[www.thestan.com](http://www.thestan.com)** to sign up for cell phone notifications via voice or text, or to sign up for email notifications. You can also check the STAN website anytime for the most recent notifications.

*You can register to receive notifications of many types.*

## STAN Features

- Delivers emergency messages to the residential and commercial telephones in affected areas.
- Delivers emergency messages to registered cell phones via voice, text or email.
- Delivers outreach messages, if requested, to registered cell phones via voice, text or email.
- Updates the STAN website with the most current notifications.

**STAN** is a messaging and notification system that gives industrial companies and emergency management officials the ability to inform the community quickly with information about emergencies, plant operations or weather events occurring in Southeast Texas.

## Partners

STAN was developed by the Local Emergency Planning Committees of Jefferson, Orange, Hardin and Jasper Counties, in partnership with the Industry of Southeast Texas, the South East Texas Regional Planning Commission and local media.

## How to register for STAN messages

- > Go to the website at [www.thestan.com](http://www.thestan.com).
- > Click "Register"
- > Complete the information form with your name, phone number, email, password and address. Providing your address allows officials to target alerts to specific areas when appropriate.
- > Select "Submit Registration"
- > You will receive a verification code via email and/or phone call. Enter the verification code on the registration verification page and click "Complete Registration."

**DON'T FORGET to update your contact information every year.**
